To Whom It May Concern:

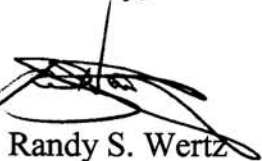

I would highly recommend the Murray Company for your medical building development needs.

The Murray Company has provided design build services for several projects for Golden Valley Memorial Hospital. Projects have ranged from minor renovations to major new construction. Regardless of project size, Murray's services have been exceptional.

You can expect the highest quality services, as well as, very strong business ethics and integrity. They possess a desire to exceed your expectations. Our most recently completed project, a new medical office building, was completed ahead of schedule and under budget. The level of satisfaction with this new facility has been extremely high with patients, physicians, staff and Board members.

Again, I would highly recommend the Murray Company without reservation.

Sincerely,

Randy S. Wertz  
Chief Executive Officer
