To Lawrence Memorial Hospital:

This is to inform you that Labette County Medical Center has done business with The Murray Company for over five years. I am pleased to report that all business has been conducted by The Murray Company in a highly satisfactory manner.

Projects include a 2.6 million dollar renovation of an antiquated area located on the hospital's third floor which was converted into a state of the art inpatient rehabilitation unit. This project finished under budget and on time. Our most recent project includes a 5.5 million dollar central plant update that is part of a 21 million dollar master plan which The Murray Company is acting as the construction manager.

In our community we have to be sensitive to local politics with various construction companies. Murray is sensitive to that and has made this a non-issue. They keep everyone in line and alleviate headaches for administration by documenting in both word and film any problems.

The Murray Company has proven itself to be a leader in healthcare construction with their knowledge of the vast changing healthcare construction regulations along with their commitment to provide quality work and ensure the safety of the parties involved for all projects.

I recommend them without any reservations. If you would like to contact me personally, I can be reached at 620-820-5372.

Respectfully,

William K. Mahoney
President and CEO
